- Improved Lighthouse speed scores 4x on average.
- Increased product page interactivity by 50% with the development of a virtual countertop system.

EXPERIENCE

• Lead Developer

The Right Way [June 2021 - Present]

Served as Technical Lead for 20 Shopify Plus clients. Set up version control for internal development and implemented a development workflow complete with documentation. Interviewed, tested, and hired a team of 8 developers. Served as the primary escalation resource for urgent issues. Worked alongside 6 project managers during sprint planning meetings to analyze client requirements and create tickets for developers. Performed code reviews and provided guidance & training to team members. Communicated with the team, the clients, and SaaS companies to deliver on project requirements.

• Lead Developer

Overdose Digital [Jan 2020 - June 2021]

Spearheading Shopify development for the New York office within an international agency spanning 6 countries. This involved managing projects and numerous individuals across the US, Ukraine, and India. Developed & customized frontend Shopify themes for multimillion dollar companies including Arizona Iced Tea, Pier1 Imports, Nine West, and Easy Spirit. Successfully contributed to Overdose's greater client revenue of \$1.25+ Billion.

• Full Stack Developer

Whole Latte Love [June 2017 - Jan 2020]

Developed and maintained online stores for 3 multimillion dollar coffee retailers: Whole Latte Love, Lavazza, and Gaggia. Served as the primary frontend developer, engineering custom JavaScript and Liquid functionality. Responsible for the backend development of Node/Express service applications used to manage inventory, orders, and content of the Shopify Plus stores Whole Latte Love and Gaggia. Developed Lavazza on Magento 2.
